

Invacare® | **Action® 3NG**

growth
COMPATIBLE

Greater driving performance

The *Invacare® Action®3NG* has been re-designed to ensure greater driving performance; a lightweight frame and high quality components make for easy rolling and manoeuvrability. An appealing 'next generation' design together with improved functionalities in terms of stability and comfort means that the **Action®3NG** marks the rebirth of our flagship product in style.

Codes: CS155XXXX or A3LD-xxXxx L or R

Benefits

Functionality

Invacare® always seeks to innovate. The **Action®3NG** introduces a new cross bar with a folding mechanism under the seat which improves stability and makes folding and unfolding even easier. Together with a new-style footplate, the Action®3 is a great choice for all-round maximum comfort.

Durability

Adaptable and modular, the **Action®3NG** accommodates progressive changes in user needs. It is also simple to refurbish, with a wide range of options. This model is a great example of a second-generation wheelchair, with a proven track record behind it.

Transportable

With a low transfer weight and foldable backrest, the **Action®3NG** is easy to fold and to dismantle, making it easily transportable in a small car.

Features

14kg weight

The total weight of 14kg addresses the need for improved handling, storage and transportation. The lowest transportation weight (without legrest, armrest and rear wheels) is 7.6 kg.

Brake and Brake extension

Fold the brake handle for easier side transfers.

Length compensating leg support

New option elevating legrest offers optimal length compensation with the elevation stepped in approx. 3 – 5 degrees.

Footrest

The proven design of the swing in / swing out footrest has an easy-to-operate quick release mechanism.

20 rear wheel positions

Driving performance is enhanced with a choice of 20 rear wheel positions as standard. Users can set the rear wheel to Standard, Medium, Active or Amputee position.

Magnesium castor attachment

A castor attachment provides ease of angle adjustment and enhanced support. The use of the magnesium attachment reduces the weight of the chair by almost 400 gram.
