

Features and options

Tilt & recline makes life comfortable

The *Rea Azalea* and *Rea Azalea Assist* have 25° seat tilt and a 30° backrest recline. Both tilt and recline can be easily adjusted manually or electrically by the assistant and also by the user for the electrical version.

The backrest has a biomechanical positioning hinge, which follows the user's natural back movement when adjusting the backrest angle. Combined with the seat-tilt function, the DSS (Dual Stability System) helps to prevent Decubitus thanks to its nonfriction re-body positioning.

Flex 3, backrest plate
Apart from being height adjustable it is now width adjustable as well.

Flex 3, tension adjustable backrest
The multi adjustable backrest can be adjusted in height and in width for different body shapes.

Wide range of options
Individual width adjustments in the armrests and legrests and accessories for individual options.

Power tilt
The hand control for tilt and recline can be used by the attendant or user.
