

## ***molift*** Smart 150

The **Molift Smart 150 portable lifter** is designed to be easily wheeled and transported to where lifting and moving is required. It has been awarded The Norwegian Design Council's Award for Design Excellence. The Molift Smart 150 is easy to fold for wheeling and to unfold in preparation for use. The Molift Smart 150 can also be divided into two parts, without the use of tools, to reduce the weight for transporting. The heaviest part weighs only 30 lbs/13.6 kg. The Molift Smart's lifting range makes lifting from the floor simple.

## **molift** Smart 150

The standard 4 Point Suspension combined with a **Molift Rgo Sling** will also allow a free and open sitting position, especially around the head area, without any risk of the head bumping into the suspension or the user swinging side to side will not feel squeezed as they may in a 2 Point Suspension. They will feel more comfortable and confident. With the combination of sling and suspension, the user will slide into a natural, correct seating position, from lying to sitting and vice versa.

### Features

- Folds in less than 10 seconds**, without tools
- Lifting capacity** of 330 lbs / 150kg
- Lightweight**, 55 lbs / 26 kg
- Easy to manoeuvre**
- Portable** and mobile
- Electric/manual lowering functions** and emergency stop
- Environmentally friendly batteries**
- Built-in software calculates** when the lifter requires servicing
- No tools required**

### Technical Facts

- Item No.** 102008
- Lifting Capacity** 330.7lbs / 150kg
- Dimensions, assembled** 1150 x 475 x 350mm
- Total Weight** 55lbs / 26kg
- Leg height Max.** 110mm
- Lifting height** Min, 270mm Max, 1680mm
- Battery** NiMH 14.4V - 2.2Ah
